WORK EXPERIENCE

Associate Product Engineer

Switch Climate Tech

Oct 2026 - Current | Pune (Remote)

- Building a sustainability product from 0 to 1, ready for deployment.

Product Engineer Intern

Switch Climate Tech

Mar 2026 - Sep 2026 | Pune (Remote)

- Shipped 35+ pull requests across 6+ repositories on Company's Feature Product, a multi-micro-frontend carbon-accounting SaaS platform, closing 110+ Jira tickets end-to-end from spec to merge.
- Resolved 20+ P0/P1 defects across 28+ emission category configurations, eliminating recurring blank-page crashes and broken filters that blocked core assessment workflows.
- Built a drag-and-drop, auto-persisting dashboard layout system, replacing manual widget configuration with a zero-touch, self-saving layout for the Company's Modules.

Web Development Intern (Full Stack)

CodexIntern

Nov 2024 | Mumbai (Remote)

- Developed 15+ reusable UI components using React.js and TypeScript, improving modularity and maintainability.
- Engineered 5+ RESTful APIs using Node.js and MongoDB with optimized schema design.
- Reduced API response latency by 30% through MongoDB query optimization and indexing.
- Containerized applications using Docker, standardizing deployment workflows.

PROJECTS

Finance AI – Financial Observability Platform

Spring Boot | PostgreSQL | Redis | Docker | Next.js

- Architected an immutable double-entry ledger handling 10K+ financial transactions with strict debit–credit validation.
- Implemented ACID-compliant transactional workflows, ensuring data consistency and reliability.
- Designed an indexed PostgreSQL schema, reducing aggregation latency by 40
- Engineered a snapshot-based net worth computation system, achieving sub-50ms analytics retrieval.
- Built idempotent CSV ingestion pipeline preventing duplicate transaction entries.
- Integrated LLM-powered expense categorization module.

AImpact – AI Interview Platform

Next.js | Gemini API | MongoDB | Clerk

github.com/shrinivaswaney22/aimpact

- Built a full-stack AI-powered interview system with mock interviews and contextual Q&A evaluation.
- Integrated LLM API for structured feedback generation workflows.
- Implemented secure authentication and protected routing using JWT-based session handling.
- Designed optimized MongoDB schema for scalable session tracking.
- Deployed production build on Vercel with CI/CD integration.
